Set-up your fitness profile, track and view reports on your steps, active minutes, exercises, sleep, weight, heart rate, blood pressure, glucose, water, and nutrition.

- Enter steps in the Track Steps section for manual entry or sync a device/app for accurate step counts.
- Active minutes do not automatically transition to steps.

WELLNESS

PORTAL

- Please note that active minutes in the Fitness and Nutrition dashboard do not automatically convert to steps.
 For this conversion, you will want to take the total time that you did an activity in minutes and multiply it by 100 (e.g. 30 minutes of cycling x 100 = 3,000 steps).
- Manually entering steps will override any existing synced steps for that day.
- If you would like to add manual steps to your synced steps, please add these on your Apple Health App and <u>NOT</u> the Fitness and Nutrition dashboard section of the FJMC wellness portal.
